

Note: To see what your payments would have been during that period, divide your mortgage amount by \$10,000; then multiply the monthly payment by that amount. (For example, in 1996 the monthly payment for a mortgage amount of \$60,000 taken out in 1982 would be: $\$60,000 \div \$10,000 = 6$; $6 \times \underline{\hspace{1cm}} = \$\underline{\hspace{1cm}}$ per month.)
