

Figure 2.12.1—Determination of Cold Wash/Cold Rinse

Cold Wash/Cold Rinse (“Cold/Cold”)

Cold Wash/Cold Rinse is the wash temperature selection with the coldest wash temperature available in the **Normal cycle**, paired with a cold rinse. If multiple wash temperature selections in the **Normal cycle** do not use any hot water for any of the water fill levels or test load sizes required for testing, *Cold Wash/Cold Rinse* is the wash temperature selection among these with the highest energy consumption (as measured according to section 3.10 of this appendix), and the others are excluded from testing and from consideration as the *Hot Wash/Cold Rinse* or *Warm Wash/Cold Rinse*.
