Note: To see what your payments would have been during that period, divide your mortgage amount by $10,000; then multiply the monthly payment by that amount. (For example, in 1996 the monthly payment for a mortgage amount of $60,000 taken out in 1982 would be: $60,000÷$10,000=6; 6×____=$____ per month.)
