

Such roofs are to be divided into sub-areas by using dividing lines of minimum length to minimize the size and number of the areas which are potentially less than or equal to 50 feet (15.25 meters) in width, in order to limit the size of roof areas where the safety

monitoring system alone can be used [1926.501(b)(10)]. Dotted lines are used in the examples to show the location of dividing lines. W denotes correct and \textcircled{W} denotes incorrect measurements of width.
