

Low-temperature:	E417.31(f)(7)		
All-Fire Impact <sup>(1)</sup>	E417.31(f)(2)	-	15
Operational Impact <sup>(2)</sup>	E417.31(f)(3)	-	15
200% Operational Impact	E417.31(f)(4)	-	5

<sup>(1)</sup> This test must subject each sample primer charge to the all-fire impact determined by the statistical all-fire impact series required by this table.

<sup>(2)</sup> This test must subject each sample primer charge to no less than the operational impact that it would receive from the percussion-activated device assembly according to the device's performance specifications, or 200% of the all-fire impact; whichever is greater.
