

To measure these pollutants	Use these methods to determine the sampling location <sup>a</sup>	Use these methods to measure pollutant concentration <sup>a</sup>	Also note the following additional information
<b>3. Acid gases<sup>c</sup></b>			
<b>Hydrogen chloride</b>	Method 1	Method 26 or 26A <sup>b</sup>	Test runs must be at least 1 hour long while the municipal waste combustion unit is operating at full load.
-----			
<b>4. Other<sup>c</sup></b>			
<b>Fugitive ash</b>	Not applicable	Method 22 (visible emissions)	The three 1-hour observation period must include periods when the facility transfers fugitive ash from the municipal waste combustion unit to the area where the fugitive ash is stored or loaded into containers or trucks.

<sup>a</sup> Must simultaneously measure oxygen (or carbon dioxide) using Method 3A or 3B.

<sup>b</sup> Use CEMS to test sulfur dioxide, nitrogen oxide, and carbon monoxide. Stack tests are not required except for Appendix F quality assurance requirements.
